## DETAILED WALKTHROUGH

Powered by twin diesel inboard 8V92 engines, the Annabel Lee is a typical riverboat design excursion vessel with a blunt model bow and three tier steel superstructure. She has a non-functional Paddlewheel on the stern.

With dining room seating for approximately 250. Each of her interior decks have a dance floor, a bar, a waitress station, and head facilities with the commercial galley located on the lower deck along with freezer & refrigerated storage. The mid level has the largest dance floor and can accommodate a large party or wedding without any problem. The top deck has covered seating with a bar and an open area with a control station to port and starboard for ease of docking. The pilothouse sits forward center. She has had new carpet installed in 2008 and is ready for business.

The vessel has a current Certificate of Inspection. The bottom was inspected by the Coast Guard 2006 and all her documentation is current. She will survey well and in great condition.
